Transformational Projects .

PROVIDING OUR CUSTOMERS WITH HIGH QUALITY ICT SERVICES.

We seek to design and implement innovative ICT solutions that will be of high quality and offer long term investment value to the owners and end users as well as help our customers/ end users get the most from their investments in technology by deriving optimal performance during its entire life cycle.

Our approach is simple - we refuse to compromise when it comes to quality. We set our standards high and then we aim to surpass them. We do this by investing in the continuous improvement of our products and services by building a team that is knowledgeable and dedicated to ensuring that we exceed the needs of our customers in our delivery

ALWAYS STRIVING & **IMPROVING IN THE PURSUIT** OF EXCELLENCE

We offer solutions that add intelligence to Real Estate. Our core solution is Shared ICT infrastructure platforms that enable different user organizations to share the same ICT infrastructure at low Capital and Maintenance Expenditures. These include:

- Virtual server platforms
- Thin Client Personal Computer solutions
- Virtual IP PABX platforms
- Shared Data Center platforms
- Triple play services
(internet, voice and video) to residential homes

We offer these solutions to commercial buildings and residential homes. Our quality structured cabling solutions support the solutions mentioned above.

Vendor Partnerships

Project Management

Our Project Management Methodology offers a group of processes, Techniques and Tools to help achieve the defined objectives of the projects in terms of timelines, cost and scope. From Definition, Planning, Execution and Closure we engage the client and all stakeholders to ensure successful implementation of the project within the defined best practices.

Audiovisual

Smartstream Audio Visual provides full service audiovisual solutions for corporates, conventions and real estate. Our purpose is to connect people in meaningful ways, and we do this with innovate presentation solutions.

We offer a wide range of state-of-the-art technology to support your face marketing events. Consider us a partner invested in creating customized audiovisual solutions that are as effective as they are impressive. We are technologically savvy extension of your business. Our innovative equipment and creative design teams are the means, and the end is your successful presentation.

Data Centers And Network Services

We offer services of the design of data centers. These include the Mechanical, Electrical, Fire & Alarm, Cooling systems, Raised Floor, Environmental monitoring and Uninterruptible Power Supply entities of Data Center Infrastructure.

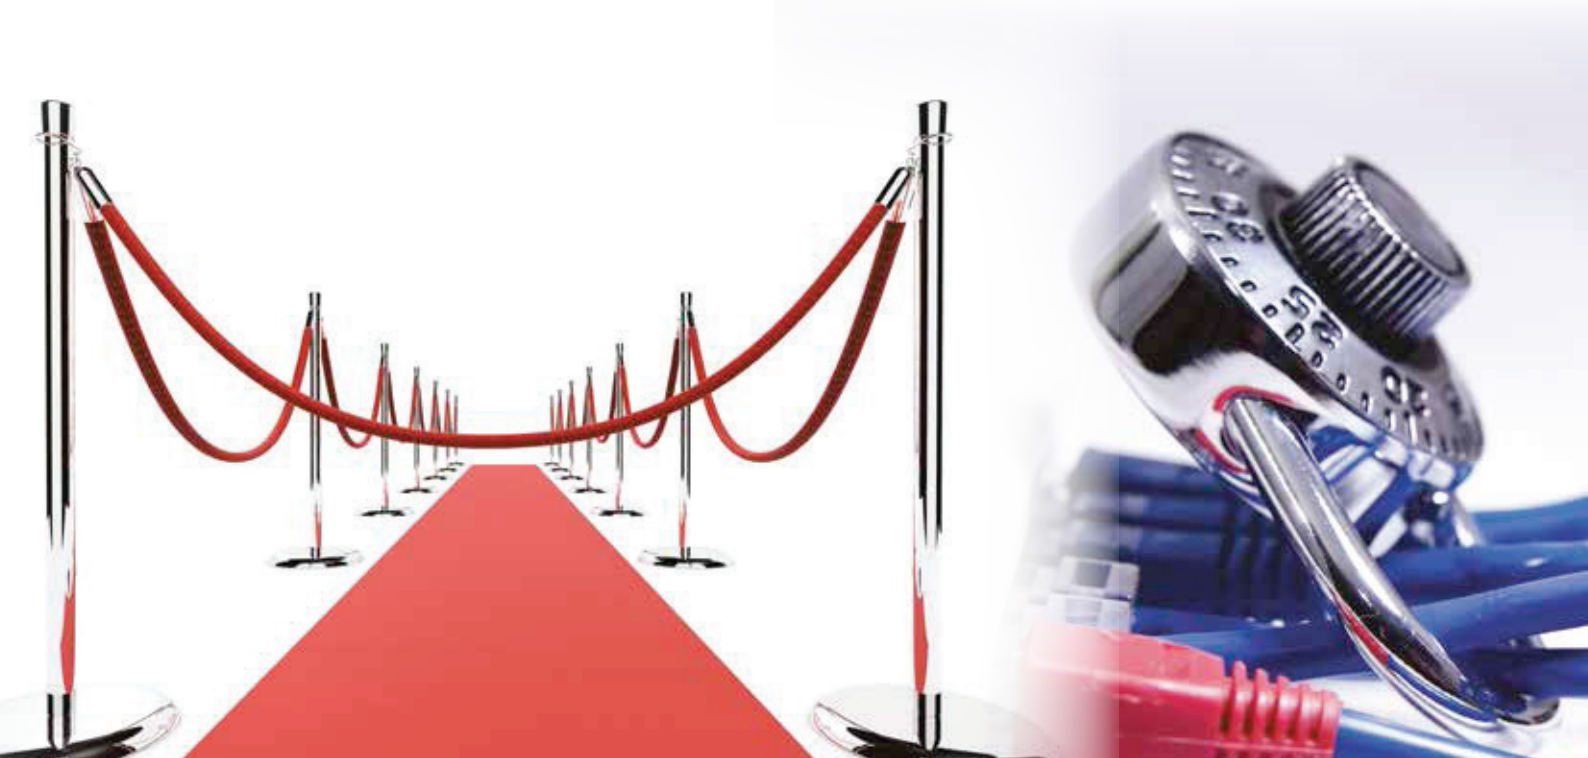

We investigate and document an existing network system with the objective of identifying the existing and future capabilities of the system with regard to its strengths and weaknesses.

It involves a thorough investigation with regard to user capacity, bandwidth, scalability, reliability, neatness, organization needs, proposing a working solution, documenting the network(current &

proposed) systems, advice accordingly on implementation plan and issuing a bill of quantities of the proposed solution.

We do also network active components installation such as switches, voice systems, wireless access points and network security equipment.

Queue Management & Security Systems

We do design and install customer flow systems which comprise of ticket printers, displays and sign boards as well as the software for the system.

The Use of customer Flow Management involves managing the customer flow and experience from initial contact to final service delivery. This helps the organizations meet centrally set targets, increase productivity and overall efficiency while improving service user and staff experiences. This in turn generates data and insights which drive ongoing business improvements.

SECURITY: Integrated systems for Access Control, Alarm, IPCCTV Cameras as well as fire and safety.

Digital Media Signage: This comprises of a system which does advertisement content.

Parking and Visitor Management:

On parking management and Visitor Management we do designs and installation of boom barriers/bollards, displays for the the parking area, automatic number plate recognition cameras, Payment Stations for parking and all the hardware and software's for a parking and visitor management system

Project Management:

On project management we do project management for ICT Infrastructure projects such as structured cabling, IPCCTV and Access control, data center infrastructure, parking and visitor management systems, Queue Management Systems, Networking solutions, Digital Media Signage.

Lifecycle approach to Services

Lifecycle services are the methodologies and practices that support the evolution of Technology Infrastructure to business systems and ensure the most return from corporate IT investments
